

Table of Contents

Introduction

1.0	Equilibrium in the Atmosphere	1
1.1	General	
1.2	Stability and Instability—Definitions	
1.3	What Causes Stability and Instability?	
1.4	The Adiabatic Process	
1.5	Relationship Between the Environment and Vertically Moving Air	
1.6	Dry and Saturated Adiabatic Lapse Rates	
1.7	The Chinook	
1.8	Equilibrium and the Weather	
1.9	How Medium and Upper Level Clouds Are Formed	
2.0	General Circulation	11
2.1	General	
2.2	Terrestrial Circulation: Development of Hadley and Ferrel Cells	
2.3	Primary High and Low Pressure Belts	
2.4	Primary Global Wind Systems	
2.5	El Niño and La Niña	
2.6	Rossby Waves—The Great Eddies	
2.7	Jet Streams	
2.8	Secondary Wind Systems—Monsoons	
2.8.1	Monsoons	
2.8.2	Summer Monsoon	
2.8.3	Winter Monsoon	
2.9	Mid-latitude Storm Zones	
2.10	Local Winds	
3.0	Air Masses	19
3.1	General	
3.2	Source Regions of Air Masses	
3.3	Classification of Air Masses	
3.4	Air Mass Characteristics	
3.5	Modification of Air Masses	
3.6	Winter Air Masses	
3.7	Summer Air Masses	
3.8	Weather Changes Caused by the Combined Effects of Seasonal and Surface Modification	
3.9	Lake Effect Snows	
3.10	Permanent Fronts Between Major Air Masses	

4.0 Extratropical Cyclones	25
4.1 What Is a Cyclone?	
4.2 Air Masses on the Move	
4.3 Why Are Frontal Surfaces Sloping?	
4.4 Development of a Frontal Depression	
4.4.1 Frontogenesis—The Beginning	
4.4.2 The Frontal Wave	
4.4.3 The Low Pressure Centre Forms	
4.4.4 The Frontal Pattern Appears	
4.4.5 The Warm Front	
4.4.6 The Warm Sector	
4.4.7 The Cold Front	
4.4.8 And Now the Final Stage of the Cycle, the Occlusion	
4.4.9 The TROWAL, (Trough of Warm Air Aloft)	
4.5 Weather in the Extratropical Regions of the Southern Hemisphere	
5.0 Tropical Cyclones	33
5.1 Difference Between Tropical and Extratropical Cyclones	
5.2 The Stages of Development	
5.2.1 Waves in the Easterlies	
5.2.2 Tropical Disturbance	
5.2.3 Tropical Depression	
5.2.4 Tropical Storm	
5.3 Finally, We Come to the Hurricane	
5.4 Classification of Hurricanes	
5.5 Formation and Structure of a Hurricane	
5.5.1 Source and Initiation	
5.5.2 Areas of Occurrence	
5.5.3 Do Hurricanes Ever Form at the Equator?	
5.5.4 The Effect of Wind Shear	
5.5.5 Where Does All the Updraught Go?	
5.6 The Eye of the Hurricane	
5.6.1 Formation, Size and Wind Speed	
5.6.2 The Calm Before the Storm! Leaving the Eye	
5.7 Signs of the Approach and Advance of a Hurricane	
5.7.1 Storm Swells	
5.7.2 Pressure Changes	
5.7.3 Winds—Finding the Storm Centre by Using Buys Ballot's Law	
5.7.4 Clouds—Sequence and Associated Precipitation	
5.8 Sailor Beware!	

5.9	Dangerous and Navigable Semicircles	
5.9.1	The Dangerous Semicircle	
5.9.2	The Navigable Semicircle	
5.9.3	Guidelines for Hurricane Navigation—Using a Storm Card	
5.10	“Land Ho!” Effects of a Hurricane on Reaching Landfall	
5.10.1	The Deadly Storm Surge	
5.11	A Tip for the Navigator	
5.12	The Hurricane Moves On	
5.13	How Does a Tropical Cyclone Finally End?	
5.14	Forecasting of Tropical Cyclones	
5.15	No Two Hurricanes Are the Same	
6.0	Forecasting.....	45
6.1	Now We Put It All Together	
6.2	The Professional Weather Map—Surface and Upper Air Information	
6.3	How Do We Select Which Forecast to Use?	
6.4	Offshore Sailing	
6.4.1	Advance Planning	
6.4.2	Weather Routing Service	
6.4.3	Weather Facsimile Broadcast (Weather Fax)	
6.4.4	The Internet	
6.4.5	VHF Radio	
6.5	Using the Forecast	
6.6	Local Weather	
6.7	Forecasting from Visual Observations—The Single Observer	
6.7.1	Where Do We Start?	
6.7.2	The Two Aspects of Observation	
6.8	Your Observation Data in Detail	
6.8.1	Pressure	
6.8.2	Pressure Tendency	
6.8.3	Air Temperature	
6.8.4	Dew Point and Relative Humidity	
6.8.5	Clouds	
6.8.6	Wind Direction and Speed	
6.8.7	Visibility	
6.8.8	State of the Sea	
6.8.9	Present Weather	
6.8.10	Past Weather	
6.9	The Moment of Truth! Now to Make a Good Forecast	
6.10	In Conclusion	

Glossary	55
Appendix A: The Saffir-Simpson Scale (Abridged)	63
Appendix B: Relative Humidity (%)	65
Appendix C: Dew Point Temperature Tables.....	67
Appendix D: Beaufort Wind Scale	69
Appendix E: Conversion Tables	71
Appendix F: Wind/Barometer Table	73
Appendix G: Weather Log	75
Bibliography	77
Index.....	79
