Introduction – Offshore Navigation for the Recreational Boater in the 21st Century.....	xiii
Course Introduction.....	xiii
Welcome to the World’s Oceans.....	xiii
Preview of the Course	xiv
Getting the Most from this Text	xv
Completing the JN Course	xvi
Accuracy, Precision, and Practices.....	xvi
Standards of Precision and Computational Practice.....	xvii
Special Note on Rounding.....	xviii
Materials and Equipment You Need for this Course	xix
References for Further Study.....	xix
Materials with the Student Manual.....	xx
Chapter 1 - Lighthouses in the Sky	1
The Fundamental Idea.....	1
Polaris—An Ancient Guide.....	2
Celestial Circles of Position	2
How Far from the GP?	4
Plotting a Celestial LOP.....	7
Altitude-Intercept Method.....	8
Preview of the Remainder of Celestial Sight Reduction.....	10
References	10
Chapter 1 Homework.....	11
Chapter 2 - The Sextant	13
Parts of the Sextant.....	14
How a Sextant Works	15
Reading a Sextant.....	16
Sextant Errors.....	17
Adjustable Errors.....	18
Determining Index Error (IE).....	18
Making an Index Correction (IC).....	19
Caring for Your Sextant.....	19
Preparing for Sight-Taking	20
How To Take Sun Sights	20
Taking Sights at Sea	23
Special Techniques	23
Timing Your Sights.....	24
Accuracy of Sights	24
Runs of Sights	25
Sight Requirements for the JN Course	25
Recording Sight Data	26
References	26
Solution to Skill Exercises	26
Optional Material	26
Choosing a Sextant.....	26
Observation Error.....	27
Optical Principle of the Sextant.....	28
Chapter 2 Homework	29

Chapter 3 - Sea Time	33
Keeping Accurate Time	33
Watch Error and Rate	34
Time Signals	34
Time and Arc	35
Zone Time.....	36
Standard Time.....	37
Visualizing Time.....	37
UT for Sights	38
Determining ZD	39
Converting ZT to UT.....	39
Converting UT to ZT.....	40
Converting One ZT to Another.....	41
Travel Time.....	41
International Date Line.....	42
Data Entry: USPS Forms.....	42
Sight Log	42
Sight Reduction Form	43
Timekeeping at Sea	43
References	44
Solutions to Skill Exercises.....	44
Optional Material	46
WWV/WWVH Programming	46
CHU Programming.....	46
Chapter 3 Homework	47
Chapter 4 - Altitude Corrections	51
Altitude Adjustments.....	51
Dip	51
Refraction	51
Center to Center.....	52
Summary	53
Applying Corrections	53
<i>Nautical Almanac</i> Tables.....	53
Sequence of Corrections.....	54
Going from <i>hs</i> to <i>Ho</i>	54
<i>USPS SR96 Form</i>	56
Summary	57
References	57
Solution to Skill Exercise	57
Optional Material	57
Refraction	58
Celestial Observation Geometry.....	58
Chapter 4 Homework	59
Chapter 5 - Celestial Coordinates	61
Defining Positions	61
Terrestrial Coordinates	62
Celestial Coordinates.....	62
Summary of Celestial Coordinates.....	64

Computing LHA for the Sun	65
References	66
Solutions to Skill Exercises	66
Chapter 5 Homework	67
Chapter 6 - Light List for the Sky	69
The <i>Almanac</i>	69
A Guided Tour	70
Between Hours	70
Interpolation	71
Variable Motion	71
Extracting Data	72
Summary	75
References	75
Solution to Skill Exercises	75
Chapter 6 Homework	77
Chapter 7 - The Celestial LOP	79
Overview	79
The Intercept	80
The Azimuth	82
The Navigational Triangle	82
The Sides	83
The Internal Angles	83
Z and Z_n	85
Method of Solution	86
Calculator Sight Reduction	86
A View of this Sight	88
Evaluating Sights	91
Computers and Calculators	91
References	92
Solutions to Skill Exercises	92
Chapter 7 Homework	93
Chapter 8 - Plotting Celestial LOPs	95
Small Area Plotting Sheets	95
Preparing a Plotting Sheet	97
Latitude	97
Longitude	97
Plotting a Sight	97
Plotting the LOP	99
Precision for Plotting	99
The Estimated Position	99
Celestial Fixes	100
Running Fixes	100
Sight Folder Observations	102
Plotting Rules	102
Summary of Labeling Rules	104
Plotting Techniques	104

References	104
Chapter 8 Homework	105
Chapter 9 - Meridian Transit of the Sun.....	107
Meridian Transit	107
Mean and Apparent Sun	108
Finding Time of Transit.....	108
Taking the Noon Sight.....	109
Computing Latitude.....	110
A Useful Sight	111
References	111
Solutions to Skill Exercise	111
Optional Material	111
Errors in Transit Observations	111
Chapter 9 Homework	115
Overview of Chapters 10-13	117
What is Offshore Navigation?	117
Planning – How do I get there?	117
Positioning –Where am I?	118
Checking – Is this where I want to be?.....	118
Additional References for Offshore Navigation.....	118
Chapter 10 – Before Casting Off - Route Planning.....	119
Voyage Preparations	119
The Ocean Environment.....	120
Some Basic Weather.....	120
Major Global Circulatory System	120
Ocean Routes	122
Pilot Charts	122
Pilot Chart - The Main Chart.....	123
Pilot Chart – The Inset Charts.....	125
Using the Pilot Chart	125
Chart Projections	128
Mercator Projection	128
Great Circles and The Gnomonic Projection	129
Relationship between Rhumb Line and Great Circle Routes	130
Great Circles, Rhumb Lines, and GPS.....	132
Charts for the Offshore Voyage	132
Sources for Charts	132
Chart Scale	133
Recommended Chart Inventory	133
Electronic Charts.....	134
Publications for the Offshore Voyage.....	134
Coast Pilots and Sailing Directions	134
Other Publications.....	135
Route Planning	135
Laying out the Route.....	135
Using the GPS in Route Planning	135
Navigator’s Notebook	136

Summary 137

References 137

Solutions to Skill Exercises 137

Optional Material 139

 Development of the Mercator Projection 139

 Figuring the Expansion 140

 Examples Using Maptech CD to Lay Out an Offshore Route 140

 Navigational Data..... 142

Chapter 10 Homework 143

Chapter 11 – Before Casting Off – Planning for Electronics & Other

Navigational Tasks 145

 Navigational Systems for Offshore 145

 Global Positioning System (GPS) 146

 Using a Chartplotter in the Offshore Environment 146

 Using a Personal Computer in the Offshore Environment 147

 Navigational Software 147

 Electronic Autopilot 149

 Other Electronic Tools..... 150

 Radar 150

 Depth Sounders 150

 Overview of Communications Equipment used on the High Seas..... 151

 Global Maritime Distress and Safety System (GMDSS)..... 151

 DSC-VHF Marine Radio 151

 Single Side Band Radio 152

 Accessing the Internet Using SSB 153

 Other Satellite Communications Providers..... 154

 Weather information 155

 Emergency Position Indicating Radio Beacons (EPIRBs) 155

 Power Consumption of Electronic Navigational Equipment 157

 Benefits of Electronic Navigation 157

 What Electronics Don't Do 157

 Planning for Electronic Failures and Backup Systems 157

 Navigator's Notebook 158

 Checklists 158

 Additional Tasks 160

 The Navigator's Station..... 160

 Summary 161

 References 161

 Optional Material 161

 Weather Information 161

Chapter 11 Homework, Practice Cruise - Part 1 163

Chapter 12 – Wind and Current..... 167

 Wind and Current Offshore 167

 Current and Leeway 168

 Vessel Motion through the Water 169

 Determining CMG and SMG 170

 Determining CMG and SMG with GPS..... 171

 Allowing for Current and Leeway..... 171

Allowing for Current.....	172
Allowing for Leeway	172
Underway	175
Correcting the Course.....	176
The Whole Picture.....	177
In the Absence of Fixes	177
References	178
Solutions to Skill Exercises.....	178
Chapter 12 Homework	179
Chapter 13 – Underway	181
Navigational Routine at Sea.....	181
Importance of Plotting and Logging Positions.....	181
Deck Log.....	182
Plotting Position Offshore.....	183
Setting up the GPS for Offshore.....	185
Checking the GPS Position	185
Checking Compass Deviation	185
Using the Deviation Table.....	186
Underway	186
Pre-departure Preparations	187
The Navigator’s Notebook.....	187
Final Checks.....	188
Taking Departure.....	188
Crew Briefing.....	188
Routine at Sea	188
Traditional Navigational Routine at Sea – A Historical Perspective	189
Navigational Routine with GPS & Traditional Methods	189
Daily Assessment	190
Night Orders.....	190
Landfall	190
Arrival	192
Charts for Offshore.....	192
Chartplotters.....	193
Plotting Sheets.....	193
Universal Plotting Sheets	193
Plotting a Day’s Work at Sea.....	195
Plotting the LOP.....	195
Estimated Positions	195
Running Fixes	196
Determining Current	196
Plotting Conventions.....	198
Chapter 13 Homework, Practice Cruise – Part 2.....	199

Appendix A – Special Altitude Corrections.....	207
Dip Short Sights	207
Artificial Horizon Sights	208
Back Sights.....	209
Appendix B – Excerpts from the Nautical Almanac	211
Appendix C – Glossary for the USPS Junior Navigation and USPS Navigation Courses	255
Appendix D – Sight Folder Requirements and Forms	265
Rules for JN Sight Folder	265
JN Sight Folder Requirements	265
Standards of Accuracy.....	267
General Rules	268
Submitting Sights for Grading.....	268
Appendix E – Answers to Homework Questions	273
Appendix F – USPS Navigation Course	285
